The Standard MIDI File (SMF) Use Awave Studio It can convert anything to anything else.. Type 2 is used to store a collection of songs or patterns, for example, numerous drum beats.. Type 1 files separate each musical part upon its own track Both Type 0 and 1 store one 'song', 'pattern', or musical performance.

Here is a freeware program to do it: Use his 'Midi File Converter' You need this DLL thing too I guess.. Mdi File[https://dedalsmith284 weebly com/blog/driver-sigmatel-high-definition-audio-codec..](https://dedalsmith284.weebly.com/blog/driver-sigmatel-high-definition-audio-codec..) 'There are 3 different 'Types' (sometimes called 'Formats') of MIDI files Type 0 files contain only one track, and all of the MIDI messages (ie, the entire performance) are placed in that one track, even if this represents many musical parts upon different MIDI channels.. (If you need to convert a MIDI file to the various Types, use my Midi File Conversion utility, available on this web site).. 'Ever wanted to play a standard MIDI file song that comes with an 'instrument bank' that were created for another wavetable sound card than yours? Awave Studio cannot only make high quality conversions between the most of the major sound cards; it can also load both the MIDI song and the instruments and play it directly for you!' 'Awave Studio can read almost any imaginable audio or instrument file format - over 200 of them in fact! And it can also write to about 100 of them!' You may find a freeware converter that will do only what you are asking. [Free Dvd Burning Software For Mac](#)
